# HILLSDALE PLANTED ROSES

ALREADY PLANTED AND STARTED FOR YOU

Undoubtedly a great boon to the Rose buyer is the Rose pot, which enables us to offer our Roses already growing and blooming. This new way of selling Roses eliminates all danger of the plants being retarded in your garden, and insures the buyer of exactly the variety desired.

These plants are growing in pots filled with a specially prepared soil, heavily fertilized to insure rapid and permanent growth and bloom. Hillsdale Roses can be planted in your garden at any time during the growing season without showing even the slightest wilt of foliage, buds or blooms.

## Directions for Re-planting Potted Roses

The re-planting of Hillsdale potted Roses is very simple indeed. The pots are slit and carefully peeled off from the soil. The ball of earth is then set in the bed so that it comes about one-half inch lower than the finished level of the beds. Always press the soil firmly around the roots of any kind of plant. This is done to force the air-space out of the soil around the roots. After this, watering to thoroughly soak the soil down to the bottom roots is all that is necessary.

## Directions for Planting Dormant Roses

After the bed has been worked fine, a hole should be dug for each plant, large enough to accommodate the roots and deep enough so that the crown or bud is an inch below the soil surface. Work some well-rotted manure or commercial fertilizer into the soil. Press the earth firmly around the roots, and water the bed thoroughly.

Watering is most important. Remember that the roots are 12 to 18 inches below the soil surface, and it takes lots of water to soak the ground to that depth.

We have found that in planting dormant Roses, a protective covering over the canes for ten days to two weeks is very beneficial. The drying action of the sun and wind is thus prevented until the root action starts, when the covering is removed, and full exposure to light and air is given. Split burlap sacks or canvas are good for this purpose, or the soil may be hilled up around the plants.

OUR ROSE-GARDEN WHERE YOU CAN SELECT YOUR PLANTS

## Quantity Prices on Our Dormant and Potted Roses

	Per doz.		Per doz.
All 70 cent Roses .....	\$7 00	All \$1.00 Roses .....	\$10 00

All prices quoted are for plants at our Nursery. An extra charge for the labor will be made when we do the planting. On out-of-town orders to be crated and sent by Express an extra charge of 20 cents per plant will be made for crating.

# HILLSDALE EVERBLOOMING HYBRID TEA ROSES

Modern Hybrid Tea Roses represent the height of the hybridizer's art. They are among the most popular flowers in the world, for both garden decoration and cutting. The blooms range from single to very double forms, through all the shades of pink, red, orange, and yellow, and in so many combinations of these shades that one gardener cannot possibly be acquainted with them all. They deserve a special place in every home garden, whether it be informal or formal in type, and will reward the grower with glorious fragrant blooms all summer long.

The varieties listed here have been carefully chosen for our locality.

**Popular Varieties of  
Hillsdale Fine Everblooming  
ROSES**

Choose these 12 hardy varieties for this year's garden. They are the most dependable everblooming Roses.

All are two-year field-grown plants, No. 1 grade. They will bloom this year throughout the summer and for years afterward.

For those who can plant their Roses early, we are offering dormant plants at a reduced rate. These dormant plants are of the same high grade as our potted Roses, and if planted early, they will grow and bloom as well as potted plants. They should be in the ground before April 15.

After April 15 only our famous potted plants will be available. These strong vigorous bushes are ready for you at any time and can be set out during the summer. You will not be disappointed in them.
